Enesta,  
Michael Patrick Leahy with Breitbart News again.

Working on another follow up story.

Here are eight specific questions regarding the pollutant levels and exfiltration rates at the Gold King mine and the Red and Bonita mine during the period before and after the August 5 spill into the Cement Creek and Animas River in Colorado:

1. What was the rate of exfiltration in GPM from the Gold King portal before the spill?
2. What is it now?
3. What was the rate of exfiltration in GPM from the Red-Bonita portal before the spill ?
4. What is it now?
- 5 .What was PPM arsenic, cadmium, lead and copper in the exfiltrating water from the Gold King portal before the spill?
6. What is it now?
7. What was PPM arsenic, cadmium, lead and copper in the exfiltrating water from the Red-Bonita portal before the spill?
8. What is it now?

On deadline, Monday at 6 pm eastern.

Thanks!

Michael Patrick Leahy
